# The AgeTech Digest - August 2025

We're kicking off August with the first episode of Season 5 of *The AgeTech Podcast* - plus funding opportunities with fast-approaching deadlines and a report worth reading for anyone building the future of aging.

---

## 🎙️ The AgeTech Podcast Season 5 Premiere

*Fresh insights from the frontlines of AgeTech*

Is AI in senior living helping deliver better care, or just do more with fewer staff?

I sat down with none other than **Steve Moran** - founder of **Senior Living Foresight** - for a conversation that blends future vision with real-world experience:

- Why AI alone won't fix senior living's biggest challenges
- How technology can strengthen - or erode - human connection
- The tech gaps still waiting to be solved
- Why families are the real customers in elder care

If you're building, buying, or using technology in senior living, this episode is packed with insights to help you think beyond the hype.

Catch the full conversation on: Youtube, Spotify, Apple Podcasts, or our Website (where you can also read the transcript).

---

## 🚀 Startup Opportunities (Deadline Approaching!)

**CTA Foundation Accessibility Contest** - A chance to showcase at CES 2026.

📝 Deadline: *August 15* → Apply here

**Prudential PEAK AgeTech Challenge** - Funding and visibility for startups improving financial wellness and longevity.

📝 Deadline: *August 15* → Learn more

**AGE-WELL National Impact Challenge** - For Canadian innovators advancing tech that supports aging in place.

📝 *Deadline: August 14* → Details here

---

## 📊 Report Worth Reading

The **Milken Institute** just released **The Future of Connected Care: Enabling Healthy Longevity and Aging at Home**

This report presents six building blocks for action and identifies how public- and private-sector stakeholders can help advance the connected care ecosystem.
